What are preserved flowers and plants?

The unique preservation technology involves the following 3 basic steps:

1 The flower/plant is harvested at the ideal point in terms of natural beauty from one of our 300.000m² of fields.

2 The freshly harvested plant enters a proprietary process to absorb a specific mixture of 100% plant-based and biodegradable preservation formula.

3 The preservation liquid replaces the sap and water within the plant, effectively forming a still-image of nature, creating a unique and 100% natural product. The preserved flowers and plants remain beautiful and unchanged for three years without watering, light and virtually maintenance-free.

4 The basic method of preserving flowers and plants has existed for many years, but was first patented as an industrial process by TOYO LiVi over 30 years ago. Through the dedicated effort by the TOYO LiVi team, the technology has optimized and upscaled to today's efficient and large scale operation.

Advantage of Preserved

Long-lasting and Maintenance-free The preservation process means that the plants require no water or light and maintain their original beauty and fresh look for even years.

100% natural All preserved products by TOYO LiVi are real, natural flowers and plants that have been treated with a plant-based and biodegradable preservation liquid. No toxic ingredients are used. **Ecological** The TOYO LiVi preserved plants are much more efficient than fresh-cut flowers, due to their long shelf life and low energy transport and storage. The result is that the preserved flowers have a carbon footprint significantly lower than for both fresh-cut and artificial flowers. Help protect the environment one rose at the time... **Economical** The TOYO LiVi natural products are excellent value because of their long useful life. **Endless Possibilities** The unique attributes and broad variety the TOYO LiVi preserved flowers make them useful in a vast array of situations. From a bridal bouquet that will keep the memory alive for years to a green wall of plants that bring nature into your life without worrying about substantial maintenance or cost.

Correct care and use

The TOYO LiVi preserved plants are extremely resistant and long lasting. With the right care, you can enjoy your natural product for even years. The TOYO LiVi natural products do not require pruning or watering.

The only care the product requires is occasional removal of dust, ideally with an air spray, air blower/dryer or alternatively dusting with a soft cloth.

To keep your TOYO LiVi flower or plant in optimum conditions, please follow this advice:

- Avoid crushing, pressing or folding the foliage, petals or flowers.
- Avoid prolonged exposure to direct sunlight
- Avoid exposure to humidity above 75%
- Only for indoor use
- No watering or placing the product in water
